DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Publication 404303075 (hereafter Fujimoto).

Re claim 1, Fujimoto discloses a front side-part structure of a vehicle, comprising a front side member (21), a fender apron inner panel (20) disposed at a lateral side of the front side member, a fender apron upper panel (22) disposed at a lateral side of the fender apron inner panel, and a reinforcing member (29) coupled with the fender apron upper panel, fender apron inner panel, and front side member.

Re claim 2, the fender apron inner panel is coupled at one end to the front side member, and the other end thereof is coupled to the fender apron upper panel by being upwardly bent (see figure 3).

Allowable Subject Matter

4. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsukahara, Behnke et al., Kim, and Nishiyama disclose reinforcements for vehicle wheel aprons.
